Linkedin: <https://www.linkedin.com/in/avinash-shinde-19a64232b/> | Portfolio: <https://avishinde1997.github.io/My-Portfolio/>

Angular Developer with 2.8 years of hands-on experience building scalable, high-performance web applications using Angular (13–19), TypeScript, JavaScript, HTML5, CSS3, RxJS, and NgRx. Strong expertise in component-based architecture, REST API integration, state management, and performance optimization (lazy loading, Core Web Vitals). Experienced in delivering data-driven dashboards and collaborating with cross-functional teams.

SKILLS

- Angular (13, 17, 19)
- TypeScript
- JavaScript (ES6+)
- RxJS
- NgRx (State Management)
- HTML5
- CSS3
- SCSS
- Bootstrap 5
- Lazy Loading
- RESTful APIs Integration
- Responsive Web Design
- GitHub
- JIRA
- Cross-Browser Compatibility

CERTIFICATION

- Full Stack Java Web Development

WORK EXPERIENCE

Angular Developer - M-Tech Engineering

Aug 2025 - Present

- Working on Mineral View application for mineral data visualization and management
- Led Angular migration from v13 → v17 → v19, resolving breaking changes and improving maintainability
- Developed map-based visualization modules for wells and lease tracking
- Implemented real-time alerts, notifications, and dashboards
- Optimized application performance using lazy loading and best practices
- Improved UI/UX for handling large-scale data efficiently

Angular Developer - Realisieren Technologies Pvt Ltd.

Aug 2023 – Jul 2025

- Developed enterprise-level applications for mineral royalties and lease management
- Built scalable UI using Angular, TypeScript, RxJS, and NgRx
- Created reusable components and handled REST API integrations
- Improved performance using lazy loading and Core Web Vitals optimization
- Collaborated with backend and QA teams in Agile environment
- Participated in code reviews and bug fixing

PROJECTS

Project 1: BPM → Bold Precious Metals (E-commerce)

Company: Realisieren Technologies Pvt. Ltd.

- Built a scalable e-commerce platform using Angular 9, TypeScript, RxJS, and NgRx
- Designed product listing, cart, and checkout workflows with seamless REST API integration
- Developed reusable and modular UI components following Angular best practices
- Integrated secure payment gateways including Apple Pay and PayPal
- Ensured fully responsive UI across desktop, tablet, and mobile devices

Project 2: Mineral View (Angular 13 → 17 → 19 Migration)

Company: M-Tech Engineering

- Developed an interactive web application for managing mineral royalties and lease data
- Led Angular migration from v13 → v17 → v19, improving maintainability and performance
- Engineered map-based visualization modules for wells and lease tracking
- Built real-time alert and notification systems for operational updates
- Enhanced application performance using lazy loading and Core Web Vitals best practices

EDUCATION

B.Tech (Mechanical Engineering) - 2021 | CGPA: 8.04

Dr Babasaheb Ambedkar Technological University,
Lonere.
