Angular Developer with ~2 years of hands-on experience building scalable, high-performance web applications using Angular (13–19), TypeScript, JavaScript, HTML5, CSS3, RxJS, and NgRx. Strong expertise in component-based architecture, REST API integration, state management, and performance optimization (lazy loading, Core Web Vitals). Experienced in delivering data-driven dashboards and collaborating with cross-functional teams.

SKILLS

- Angular (13, 17, 19)
- TypeScript
- JavaScript (ES6+)
- RxJS
- NgRx (State Management)
- HTML5
- CSS3
- SCSS
- Bootstrap 5
- Lazy Loading
- RESTful APIs Integration
- Responsive Web Design
- GitHub
- JIRA
- Cross-Browser Compatibility

CERTIFICATION

- Full Stack Java Web Development

WORK EXPERIENCE

Angular Developer - Realisieren Technologies Pvt. Ltd.

Aug 2023 - Jul 2025 (1 Year 11 Months)

Worked as an Angular Developer on multiple production-grade applications, including an enterprise platform for mineral royalties and lease management and a client-facing e-commerce application

Owned frontend feature development using Angular, TypeScript, RxJS, and NgRx following component-based architecture across different modules and projects

Collaborated with backend, product, and QA teams to understand requirements and deliver scalable, reusable UI solutions

Implemented state management, REST API integration, and reusable components to support complex data workflows and business logic

Ensured application performance, responsiveness, and cross-browser compatibility across devices and browsers

Participated in code reviews, bug fixing, and continuous UI improvements in an agile development environment

PROJECTS

Project 1: Mineral View (Angular 13 → 17 →19 Migration)

Developed an interactive web application for managing mineral royalties, lease valuations, and real-time well activity

Led migration from Angular 13 to Angular 17 and later to Angular 19, resolving breaking changes and improving maintainability

Implemented map-based visualization modules to display wells and lease locations for geographic analysis

Built alert and notification systems for production, permits, and operational changes

Optimized performance using lazy loading and Core Web Vitals best practices, improving load times and user experience

Project 2: BPM → Bold Precious Metals (E-commerce)

Built an e-commerce platform for precious metals using Angular 9, TypeScript, RxJS, and NgRx

Developed product listing, cart, and checkout workflows with seamless REST API integration

Implemented secure payment gateways including Apple Pay and PayPal

Created reusable, modular UI components following Angular best practices

Ensured fully responsive UI across desktop, tablet, and mobile devices

EDUCATION

B.Tec h (Mechanical Engineering) - 2021 | CGPA: 8.04

Dr Babasaheb Ambedkar Technological University,
Lonere.
