

Avinash Shinde

Angular Developer

+91-8208651639 | avinash.shinde.as06@gmail.com | Pune, INDIA | Experience: 1 Years 11 Month

Angular Developer with nearly 2 years of hands-on experience building scalable, high-performance web applications using Angular, TypeScript, JavaScript, HTML5, CSS3, RxJS, and NgRx. Strong in component-based architecture, REST API integration, performance optimization (lazy loading, Core Web Vitals), and responsive UI development. Experienced in delivering data-driven dashboards and collaborating with cross-functional teams.

SKILLS

- Angular
- JavaScript (ES6+)
- TypeScript
- HTML5
- CSS3
- SCSS
- Bootstrap5
- RxJS
- NgRx
- GitHub
- Cross-Browser Compatibility
- Responsive Web Design
- RESTful APIs
- JIRA Tool
- Angular Framework

CERTIFICATION

- Full Stack Java Web Development

WORK EXPERIENCE

Angular Developer - Realisieren Technologies Pvt. Ltd.

Aug 2023 - Jul 2025

Developed an interactive web application for managing mineral royalties, lease valuations, and real-time well activity using Angular, RxJS, NgRx, and SCSS.

Implemented advanced mapping modules to visualize wells and lease locations, enabling intuitive geographic tracking and data interaction.

Built alert and notification systems to notify users of critical changes in production, permits, or well behavior—enhancing decision-making.

Designed a unified interface combining data analytics (production rates, commodity prices, lease history) with a centralized “Knowledge Center” for document access and insights.

Optimized performance through lazy loading and Core Web Vitals enhancements, delivering seamless UX and fast loading times.

Ensured responsive design for multi-device accessibility—across desktops, tablets, and mobile.

Collaborated with backend teams to integrate RESTful APIs that aggregated production and lease data efficiently and reliably.

PROJECTS

Project 1: Mineral View

Developed an interactive web application for managing mineral royalties, lease valuations, and real-time well activity using **Angular, RxJS, NgRx, and SCSS**.

Contributed to migrating the application from Angular 13 to Angular 17 and later to Angular 19, resolving breaking changes, updating dependencies, and improving performance and maintainability.

Implemented advanced **mapping modules** to visualize wells and lease locations, enabling intuitive geographic tracking and data interaction.

Built **alert and notification systems** to inform users of critical changes in production, permits, and well behavior.

Designed a unified interface combining **data analytics** (production rates, commodity prices, lease history) with a centralized **Knowledge Center**.

Optimized performance through **lazy loading and Core Web Vitals enhancements**, ensuring fast load times and a seamless user experience.

Project 2: BPM (Bold Precious Metals)

Worked as an **Angular Developer** building an e-commerce platform for precious metals using **Angular 9, TypeScript, SCSS, RxJS, and NgRx**.

Developed **product listing, cart, and checkout flows** with seamless integration of **REST APIs**.

Implemented **payment integrations** including **Apple Pay and PayPal** to support secure online transactions.

Built **reusable and modular UI components** following Angular best practices to improve maintainability and scalability.

Ensured **fully responsive UI** across desktop, tablet, and mobile devices using SCSS and responsive design techniques.

Improved user engagement by optimizing UI interactions, contributing to a **reduced bounce rate**.

EDUCATION

2021 B.Tech. | Mechanical Engineering | CGPA: 8.04

Dr Babasaheb Ambedkar Technological University,
Lonere.
